## **EXPANSION OF CBL'S FAST TRACK DATA RECOVERY SERVICE TO 26 POST OFFICES ISLANDWIDE**

***Well-received service spurs increased accessibility to more post offices in Singapore***

**SINGAPORE, 24 August 2005** – CBL Data Recovery Technologies, a leading international provider of computer data recovery services today announce the expansion of the Fast Track Data Recovery Service to 26 post offices islandwide, in response to the high take-up rate of the service.

Launched in September 2004, the service was initially available at seven post offices. Since then, it has helped many small and medium enterprises, as well as individuals to retrieve their data and get their business or personal activities back on track with minimal delay.

The Fast Track Data Recovery Service is the only service that puts expert data recovery within easy reach of anyone who wishes to recover data from damaged equipment such as hard disk drives, servers, removable media, tape cartridges and flash memory.

This drop-off-and-pick-up service provides customers with the convenient option of having their affected data storage media packaged in special anti-static and anti-shock boxes and delivered by SingPost to CBL's expert data recovery engineers at its state-of-the-art laboratory at The Signature, Changi Business Park. Customers can then collect it or have it delivered back to their selected post office, their home or office once the data recovery is complete.

Starting from today, the following 19 post offices will offer the Fast Track Delivery Service: Alexandra, Ang Mo Kio Central, Balestier Road, Bedok Central, Bukit Batok Central, Bukit Panjang, Choa Chu Kang Central, Clementi Central, Hougang Central, International Merchandise Mart, Jurong West, Marine Parade, Newton, Orchard, Pasir Ris Central, PSA Building, Serangoon Garden, Bukit Merah and Yishun Central. This is in addition to the existing seven post offices at Change Alley, Kent Ridge, Killiney Road, Singapore Post Centre, Tampines Central, Toa Payoh Central and Woodlands Central.

“SingPost’s drop-off-and-pick-up service has proven to be a fast and efficient way for customers to deliver and collect their equipment from us. Customers will not have to worry about the logistics aspect of sending their equipment to us. The expansion of the number of post offices offering the service will provide greater convenience to customers as there are now more locations for them to drop off their equipment.” says Samuel David, Managing Director, CBL Data Recovery Technologies Singapore.

“We have had positive feedback from customers who are satisfied with the personalised, reliable and convenient services that the Fast Track Data Recovery Service provides. To meet the increasing needs of customers, the number of post offices offering this service has increased from the current seven to 26. In this way, customers will have greater accessibility should they need the data recovery service,” said Ms Cindy Siu, Senior Vice President for Retail Business, SingPost.

A leader in its field, CBL is a multinational data recovery organization with facilities in the United States, Canada, Brazil, Barbados, England, Germany, China, Singapore, Japan and Australia. The company has been focused solely on the data recovery market for more than a decade. Through its on-going research and development efforts, CBL has created a library of proprietary processes to successfully recover data from failed hard disk drives when all other conventional methods have failed.
